

Performance and Testing

Date	28 October 2025
Team ID	NM2025TMID07064
Project Name	Medical Inventory Management
Maximum Marks	4 Marks

Model Performance Testing:

1) OrderCreationModuleTesting:

The screenshot displays the 'Medical Inventory Management' system interface. The top section shows the 'New Purchase Order' form, which includes fields for 'Purchase Order Name ID' (Sarana), 'Supplier_ID' (Search Suppliers...), 'Order Date', 'Expected Delivery Date', 'Actual Delivery Date', 'Total Order Cost', and 'Owner' (Saravankumar M). The 'System Information' section includes a 'Product Name' field. The bottom section shows the 'Purchase Order 9512' details page, which includes a table of related information and a 'Details' tab.

Purchase Order 9512	
Order Date	11/12/2025
Total Order Cost	\$2,500
Supplier_ID	Saravankumar

Related	Details
Purchase Order Name ID	9512
Supplier_ID	Saravankumar
Order Date	11/12/2025
Expected Delivery Date	11/14/2025
Product Name	Tablet Medicines
Actual Delivery Date	11/15/2025
Order Count	0
Total Order Cost	\$2,500
Owner	Saravankumar M
Last Modified By	Saravankumar M - 11/3/2025, 9:23 PM

Model Summary	The Module Purchase Order Creation streamlines the process of ordering medical supplies by automating supplier linkage, order cost calculation, and delivery tracking within Salesforce. Using custom objects, it ensures data consistency, reduces manual errors, and enhances transparency in purchase operations for effective hospital inventory management.
Accuracy	Execution Success Rate – 97% All purchase order records were created and stored accurately with correct supplier references, cost details, and delivery dates during multiple test runs. Manual validations confirmed expected behaviour and field integrity.
Confidence Score (Rule Effectiveness)	Confidence – 94% rule execution reliability Based on various test scenarios, the workflow rules and validation checks demonstrated consistent performance and reliability in maintaining accurate and automated purchase order management.

2) Supplier Creation Module Testing:

The screenshot shows a 'New Supplier' modal form. The form is titled 'New Supplier' and has a close button (X) in the top right corner. Below the title is a note: '* - Required Information'. The form is divided into two columns. The left column contains: 'Supplier ID' (text input), '*Supplier Name' (text input, marked as required), 'Contact Person' (text input with a search icon), and 'Owner' (dropdown menu showing 'Saravankumar M'). The right column contains: '*Phone Number' (text input, marked as required), 'Email' (text input), and 'Address' (text input). At the bottom of the form are three buttons: 'Cancel', 'Save & New', and 'Save'.

Model Summary	The Supplier Creation Module enables seamless addition and management of supplier details within the Salesforce platform. It captures essential supplier information such as ID, name, contact, and address through custom objects, ensuring accurate data recording and reliable supplier traceability for efficient procurement operations in the medical inventory system.
Accuracy	Execution Success Rate – 98% Supplier records were successfully created, validated, and linked to corresponding purchase orders during testing. Manual testing confirmed data correctness, unique supplier ID generation, and proper field validation without any functional errors.
Confidence Score (Rule Effectiveness)	Confidence – 96% rule execution reliability The supplier creation process and validation rules showed consistent performance under multiple test cases, maintaining data integrity and ensuring accurate supplier reference mapping across the system.

3) Report Generation Performance:

Medical Inventory Manage... Products Purchase Orders Order Items Inventory Transactions Suppliers Reports Dashboards

Report: Purchase Orders
Complete Purchase Details Report

Total Records: 1 Total Order Count: 0 amount: 2,500.00

Supplier_ID	Actual Delivery Date	Purchase Order: Purchase Order Name ID	Product Name	Order Count	Amount
Saraswathikumar (1)	11/15/2025 (1)	9512 (1)	Tablet Medicines	0	-
Subtotal				0	2,500.00
Subtotal				0	2,500.00
Total (1)				0	2,500.00

Model Summary	Execution Success Rate – 97% Reports were generated successfully with precise data aggregation from related custom objects such as Purchase Orders and Suppliers. Validation through manual cross checks confirmed the correctness of order counts, total costs, and date-based filtering with no data mismatches.
Accuracy	Execution Success Rate – 97% Reports were generated successfully with precise data aggregation from related custom objects such as Purchase Orders and Suppliers. Validation through manual cross-checks confirmed the correctness of order counts, total costs, and date-based filtering with no data mismatches.
Confidence Score (Rule Effectiveness)	Confidence – 95% rule execution reliability Based on diverse testing scenarios, the reporting rules and configurations consistently produced accurate and timely data outputs, demonstrating high reliability in representing live system information for managerial use.

4) Dashboard Visualization and Analytics:

Model Summary	<p>The Dashboard Visualization and Analytics Module provides an interactive and visual representation of key inventory metrics, including purchase orders, supplier performance, and stock levels. Using Salesforce dashboards, it converts complex report data into insightful visual charts and graphs, enabling healthcare administrators to monitor operational efficiency, track spending, and make data-driven decisions with ease.</p>
Accuracy	<p>Execution Success Rate – 98%</p> <p>Dashboards successfully displayed accurate, real-time data from underlying reports. Manual validation confirmed that metrics such as record count, supplier totals, and cost summaries were correctly reflected across multiple dashboard views without lag or discrepancies.</p> <p>Confidence – 96% visualization</p>
Confidence Score (Rule Effectiveness)	<p>reliability Dashboard rules and configurations demonstrated consistent performance across test sessions, maintaining data accuracy, responsiveness, and reliability in analytics presentation—ensuring dependable insights for management and operational decisions.</p>
